DETAILED ACTION

Response to Amendment

1. Acknowledgement is made of the amendment filed by the applicant on 12/22/2004 to correct minor errors in the specification and the claims. The Examiner has accepted the corrections.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 01/18/2005 has been considered by the examiner. A signed and initialed copy of the PTO-1449 is included herewith.

Allowable Subject Matter

3. Claims 1-32 are allowed.

4. Claim 1 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a method of polarimetry comprising the steps of, performing a phase sensitive detection on an output signal by using a modulation signal as a reference signal to obtain a demodulation signal, and, calculating an angle of rotation from three or more polarization signals and three or more demodulation signals, and measuring repeatedly at least one measuring point "Pi" when the calculated angle of rotation is judged not effective, in combination with the rest of the limitations of the respective claims.

5. Claims 2-8 are allowed because their limitations are dependent on limitations of independent claim 1 or an intermediate claim.

6. Claim 9 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious method of polarimetry comprising the steps of, performing a phase sensitive detection on an output signal by using a modulation signal as a reference signal to

obtain a demodulation signal, and, calculating an angle of rotation from three or more polarization signals and three or more demodulation signals, and measuring repeatedly at least one measuring point "Pi" when the calculated angle of rotation is judged not effective, in combination with the rest of the limitations of the respective claims.

7. Claims 10-16 are allowed because their limitations are dependent on limitations of independent claim 9 or an intermediate claim.

8. Claim 17 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a method of polarimetry comprising the steps of, performing a phase sensitive detection on an output signal by using a modulation signal as a reference signal to obtain a demodulation signal, and, calculating an angle of rotation from two measuring points obtained from two polarization signals and two demodulation signals, in combination with the rest of the limitations of the respective claims.

9. Claims 18-24 are allowed because their limitations are dependent on limitations of independent claim 17 or an intermediate claim.

10. Claim 25 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious method of polarimetry comprising the steps of, performing a phase sensitive detection on an output signal by using a modulation signal as a reference signal to obtain a demodulation signal, and, calculating an angle of rotation from two measuring points obtained from magnetic field strengths and two demodulation signals, in combination with the rest of the limitations of the respective claims.

11. Claims 26-32 are allowed because their limitations are dependent on limitations of independent claim 25 or an intermediate claim.

12. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
